#### Word from the Board Chair

It gives me great pleasure to welcome you all to the 23rd annual general meeting of ADS Western.

As we look back at the year 2021, we are truly grateful to God that we managed to pull through inspite of the many challenges, particularly occasioned by the corvid19 pandemic. Of great encouragement to us is that the communities we work with managed through the tough period with a great show of resilience.

Political campaigns were heightened with limited civic education to citizens across the country. ADS-W undertook various engagements as the campaigns set in as part of contributing to a peaceful electioneering period. This included undertaking continuous dialogue amongst ethnic groups,

inter faith groups, state departments, youth, women, political leaders, private sector and media.

Climate change remained a subject of great discourse and engagement. The green Anglican movement initiated continued support to communities by promoting tree planting, championing for proper waste disposal and environmental advocacy. ADSW continued to undertake climate advocacy work in Vihiga, Nandi, Trans Nzoia and Kericho counties. In Vihiga, we contributed to mainstreaming of climate change activities in the County and enhanced operationalization of 25 climate change ward committees. This was in addition to enhanced coordination among the ministries with regard to climate change matters.

The sustainability of ADSW continues to beckon on us to enhance local resource mobilization in view of the dwindling donor funding. Greater efforts went to strengthening the ADS Western Region Investment Company (AWRICO). The proposed center of excellence (ADS-W Regional Resource and Training Center) offers a great opportunity for sustainability especially as we consider providing space and facilities for community learning and training. Am glad that the diocesan Bishops embraced implementation of ADS-W awareness Sunday for greater ownership and sensitization of ADS-W at the congregation level.

The current trends emanating from the effect of Russia-Ukraine war has trickled down to Kenya resulting to high cost of living. We continue to build the capacity of our small holder farmers to adopt sustainable land management and utilization of local resources for regeneration purposes and improved productivity.

We are grateful to our funding partners for their generous support and accompaniment on the journey of holistic and sustainable development. We are always better together!

Thank you and God bless you all.

#### Rt. Rev. Dr. Joseph M. Wandera

#### Word from the CEO

#### **Greetings!**

I am pleased to present our 2021 annual report which details various milestones in light of our organizational mission.

The Year 2021 came hot on the heels of the Corvid-19 pandemic which defined the year 2020. As we embarked on the year, there were still high incidences and thus high infection rates of Corona virus. Quite a number of containment measures were in place especially social distancing, masking and hand washing. As an institution that works with the marginalized and rural poor populations, suffice to say that Corvid-19 dealt a heavy blow to many of our farmers and small scall business people thus curtailing their sources of livelihoods to a great extent. I am glad and thankful to indicate that ADS Western kept afloat despite the pandemic.

We are glad to have received new funding during the year thus providing us with the opportunity to continue with our community interventions. We got new funds from SNV for *Regenerative Agriculture for Improved Livelihoods and Markets* project (REALMS) covering 5 Counties and ADA Consortium for Climate governance work in Vihiga, Kericho and Trans Nzoia Counties. We also got extended funding from Christian Aid and World Renew. On the same breath, we wound up the following projects; Making Well Informed Efforts in Nurturing OVCs (MWENDO) by USAID through MTRH, Fisherfolk project, and Conservation Agriculture Project. This report captures stories of change which are evidence of the transformation work of ADS Western through her various interventions.

The year 2021 was marked with heightening campaigns as the Country geared towards the 2022 general elections. ADS-W partnered with likeminded organizations to sensitize communities through various platforms towards a peaceful electioneering period. The organization joined together with the wider ADS fraternity for a peace symposium organized with ADS-K in Kisumu under the theme, 'Peace and Development: Collaboration towards Sustainable Peace in Kenya'.

At the governance level, board members underwent induction as well as training on organizational resourcing. The board inaugurated various committees for effective functioning. The board embarked on planning and preparation for ADS-W 25<sup>th</sup> anniversary celebrations slated for 2022. We remain very grateful to the Board of ADS Western which gave oversight to the institution to ensure that it remains a going concern. We are very thankful to all our partners and stakeholders for the great synergy and joint efforts towards the transformation of lives.

A major highlight in our journey towards local resource mobilization is that we managed to raise Kes. 142,557 from our local Anglican congregations towards the sustainability Kitty.

We look forward with renewed hope and versatility, as we work towards a sustainable and resilient institution.

Stephen N.Amusala (Mr.) Chief Executive Officer

## **OUR VISION STATEMENT**

A sustainable, Holistic, Godfearing society

## **OUR MISSION STATEMENT**

We exist to build partnerships with communities and empower them to address their needs

## **THEMATIC AREAS**

Climate Change Adaptation and Resilience

Food and Nutrition Security

Universal Health Care and Social Protection

Organizational Development

Advocacy and Governance

## Core Values

#### UPHOLDING CHRISTIAN PRINCIPLES

We speak and act honestly. We are open and factual in our dealings with donor constituencies, project communities, governments, the public at large, and with each other. We strive for consistency between what we say and what we do.

#### **STEWARDSHIP**

We are stewards of God's creation. We care for the earth and act in ways that will restore and protect the environment. We ensure that our development activities are ecologically sound.

#### NCLUSIVITY

We ensure a diverse and inclusive environment for both the staff and the community at large with our Non-Harassment and Non-Discrimination policies as a guiding factor.ADSW also works with the communities to develop a mindset of inclusivity.

#### PROFESSIONALISM

We are committed to creating an environment that demonstrates professionalism, guided by the organizational Code of Conduct.

#### TEAMWORK

Through training, ADSW encourages teamwork thus resulting in increased productivity and unity within the staff, community, and stakeholders.

#### PARTNERSHIP

We accept obligations of joint participation, shared goals, and mutual accountability that true partnership requires. We maintain a co-operative stance and a spirit of openness

www.adswesternregion.org

#### About Us

The Anglican Development Services, Western Region is a Faith-based development organization registered on 6th of January 1997 as Anglican Church of Kenya – Western Region Christian Community Services (ACK-WRCCS). It was however rebranded in 2014 giving its current name of **Anglican Development Services** (ADS)-Western limited in the context of a national realignment within the Anglican Church of Kenya (ACK). It is the development arm of the six (6) dioceses of the Anglican Church of Kenya Western Region namely: Bungoma, Butere, Katakwa, Maseno North, Mumias and Nambale Dioceses.

ADS Western has worked primarily with community groups in Vihiga, Kakamega, Busia and Bungoma since inception with the aim of realizing sustainable development. From time to time, the work of ADS has stretched to neighbouring Counties. This has been made possible through building partnerships with communities and other relevant stakeholders. Currently, the total coverage area of ADS-W is estimated to be 8,435 sq. km with an estimated population of over 5,013,873 according to the 2019 census (GoK, 2019).

In her socio-development model, ADSW embraces problem identification, problem solving, capacity building and informed decision making as tools for community empowerment. This enables the targeted population to think critically and find solutions to their own problems.

## **ANNUAL REPORT 2021**

# **"Financial Report**

## **FINANCIAL SUMMARY YEAR 2021**

Calvary greetings kingdom family. We are very grateful to God almighty for all the blessings and opportunities He brought upon ADS Western in 2021. The financial performance of the organization was as described below. In the year 2021, ADSW received grants amounting to Kes.149,121,416 and other income of Kes.735,695. The total income for the period was Kes.149,857,111 compared to Kes. 212,782,381 in the year 2020. This is a drop of Kes. 62,925,270 representing 29.57% from the previous year.

The decrease was occasioned by expiry of health funding contracts and also a shift in the scope of some health projects that was against the core values Christianity and ADS Western.

The expenditure for the period was Kes.152,447,146 compared to Kes. 224,602,415 in the year 2020. There was a decrease of Kes.72,155,269 in expenditure occasioned by expiry of funding contracts. The deficit for the year was Kes. (2,590,035) compared to Kes. (11,820,034) in 2020.

Non Current assets for the year 2021 were at Kes.9,268,400 compared to Kes.11,587,245 This is a decrease of Kes. 2,318,845 occasioned by asset write offs, transfers and annual depreciation. Current assets for the period were at Kes.18,491,093 compared to Kes.19,359,413 in the year 2020. This is a decrease of Kes. 868,320. The decrease is as a result of movements in accounts receivables and bank balances.

The net assets for the year were at Kes.21,699,866 compared to Kes.24,616,959 represented by funds of Kes.21,699,866 in 2021 and Kes.24,616,959 in 2020. This is a decrease of Kes. 2,917,093 as a result of asset write offs, transfers, depreciation and movement in funds.

The cash flows for the period were at Kes. 15,390,509 compared to Kes. 15,507,391 representing a decrease in cashflows of Kes. 116,882.

We are very grateful for the support we have received from the board of directors, our partners, stakeholders and the Anglican Church fraternity for the resources they channeled to us to enable us achieve the remarkable growth in 2021.

With gratitude , Violet S. Kalungu-Anusu Head of Finance and Operations

## REPORT OF THE GOVERNORS YEAR ENDED 31 DECEMBER, 2021

The Governors submit their report together with the audited financial statements for the year ended 31 December, 2021 which disclose the state of affairs of the company as at that date.

#### **Principal Activity**

The principal activity of Anglican Development Services Western Limited is promotion of rural development in western Kenya

#### **Results and Dividends**

The deficit for the year of KES 2,590,035/= (2020: 11,820,034/=) has been deducted from the fund balances. ADS Western is a faith based not-for-profit organization and does not distribute its balances as dividends.

#### Directorate

The Governors who were in office during the year and to the date of this report are listed on page 1.

#### Independent Auditor

Crowe Erastus & Co., Certified Public Accountants have expressed their willingness to continue in office in accordance with Section 719 (2) of the Companies Act, No. 17 of 2015 (Laws of Kenya).

#### **BY ORDER OF THE BOARD**

(For and on its behalf)

Nairobi <u>30<sup>th</sup> June, 2022</u>

Elvira Wilunda (Company Secretary)

## STATEMENT OF GOVERNORS' RESPONSIBILITIES YEAR ENDED 31 DECEMBER, 2021

The Governors are required to prepare and fairly present the financial statements for each financial year which give a true and fair view of the state of affairs of Anglican Development Services Western Limited at the end of the financial year and its operating results for the year being reported on. The Governors are required to ensure that proper accounting records that are sufficient to show and explain the transactions of the Company and disclose, with reasonable accuracy, the financial position of the Company are maintained. The Governors are also responsible for safeguarding the assets of the Company, and for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Governors accept responsibility for the preparation and fair presentation of financial statements that are free from material misstatement whether due to fraud or error. They also accept responsibility for:

- 1. Designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of the financial statements;
- 2. Selecting and applying appropriate accounting policies; and
- 3. Making accounting estimates and judgments that are reasonable in the circumstances.

Having made an assessment of the Company's ability to continue as a going concern, the Governors are not aware of any material uncertainties related to events or conditions that may cast doubt upon the Company's ability to continue as a going concern.

The Governors acknowledge that the independent audit of the financial statements does not relieve them of their responsibilities.

#### Approved by the Governors on <u>30<sup>th</sup> June 2022</u> and signed by:

| Rt. Rev. Joseph Wandera | Rt. Rev. Charles Kaskan |
|-------------------------|-------------------------|
| (Chairman)              | (Treasurer)             |
| + AP - 3                | 40000000000             |
| Stephen A               | Amusala                 |
| (Chief Execut           | tive Officer)           |
| (G) 34                  | 6.                      |

## **REPORT OF THE INDEPENDENT AUDITOR** ANGLICAN DEVELOPMENT SERVICES WESTERN LIMITED YEAR ENDED 31 DECEMBER, 2021

#### **Independent Opinion**

We have audited the accompanying financial statements of Anglican Development Services Limited set out on pages 6 to 26, which comprise the statement of financial position as at 31 December, 2021, the statement of comprehensive income, statement of changes in fund balances and statement of cash flows for the year then ended and a summary of significant accounting policies and other explanatory notes.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Anglican Development Services Western Limited as at 31 December, 2021, and of its financial performance and its cash flows for the year then ended in accordance with generally accepted non-profit accounting principles, applicable international financial reporting standards and the requirements of the Kenyan Companies Act. No 17 of 2015.

#### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISA). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the audit of the financial statements section of our report. We are independent of Anglican Development Services Limited in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of financial statements in Kenya, and we have fulfilled our ethical responsibilities in accordance with those requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Responsibility for the Financial Statements**

As stated in page 3, the Governors are responsible for the preparation and fair presentation of these financial statements in accordance with applicable international financial reporting standards and the requirements of the Kenyan Companies Act No. 17 of 2015. This responsibility includes designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

In preparing the financial statements, the Governors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Governors either intend to liquidate the Company or to cease operations or have no realistic alternative but to do so.

## **REPORT OF THE INDEPENDENT AUDITOR (CONT...)** ANGLICAN DEVELOPMENT SERVICES WESTERN LIMITED YEAR ENDED 31 DECEMBER, 2021

#### **Other Information**

The Governors are responsible for the other information. Other information comprises the information included in the Annual Report but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### **Responsibility of the Independent Auditor**

- Our objectives and responsibility are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an independent auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements
- As part of an audit in accordance with ISA, we exercise professional judgment and maintain professional scepticism throughout the audit. We also
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal controls.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Governors.
- Conclude on the appropriateness of Governors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty

## **REPORT OF THE INDEPENDENT AUDITOR (CONT...)** ANGLICAN DEVELOPMENT SERVICES WESTERN LIMITED YEAR ENDED 31 DECEMBER, 2021

exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of the auditor's report. However, future events or conditions may cause Anglican Development Services Western Limited to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal controls that we identify during our audit.

#### **Report on Other Legal Requirements**

As required by the Kenyan Companies Act, No.17 of 2015 we report to you, based on our audit, that:

- a) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
- b) in our opinion proper books of account have been kept by the company, so far as appears from our examination of those books; and
- c) the company's statement of financial position and statement of comprehensive income are in agreement with the books of account.

CPA Francis Ugango practices in CROWE ERASTUS & Co. with other partners. The engagement partner responsible for the audit resulting in this independent auditor's report is CPA Francis Ugango - Practising Certificate No. P/2227.

## **PROJECT IMPLEMENTATION CHALLENGES**

- The occurrence of Covid-19 affected the full participation of producer group members in various forums. ADSW utilized frontline SMS, Whatsup with user friendly message to reach out to members.
- Lack of reward mechanism for TOTS, and Community Health workers. Linkages was done to existing county government structures as well as private sectors for provision of services geared towards creating business.
- Lack of sharing mechanism amongst gender. Trainings were done when Males, females and youth were available using the gender seasonal calendar.
- Lack of recognized community based seed production and marketing system. ADSW has made linkages with KALRO and KEPHIS in support of seed certification and outlet markets.
- End of donor funding resulted to loss of projects and competent staff which further affected sustainability of communities especially in health related projects. ADSW continued with trainings on resource mobilization for staff and the board as well as instituting a resource mobilization committee.
- Some agricultural technologies and innovations were limitedly adopted by women farmers because of their technical and labor-intensive designs which was more suitable for commercial farmers. ADSW introduced Conservation agriculture practices such as use cover crops, kitchen gardens which were practiced by women.
- Lack of seed for soya bean, competition from other soya off takers as well as proper branding and product certification. ADSW initiated business to business linkages for soya value chain.
- High cost of input due to rise in fuel prices (linked to COVID19).Farmers were organized into groups to purchase inputs at affordable prices as well as use ecofriendly technologies towards production of seed and improved soil fertility.
- Political uncertainty which led to low farmer turn out during project activities. ADSW planned meetings in the morning and also conveyed peace message during project activities.
- High costs of soy kits for value addition led to reduced procured soy kits from 50 to 25. More linkages were done to private sectors in support for the Kits.
- Access to market challenges such as price dynamics, untimely off-take of soya by Equatorial Nut Processor from AWRICO limiting continuous off-take of soybeans from mini aggregators and farmers.

## LESSONS LEARNT

- The printed handbook for Stakeholders directory provided a mechanism establishing networking and referral linkages with all duty bearers and service who promoted child protection leading to more effective and efficient services.
- Prevention and response efforts through awareness creation, capacity building, lobbying and advocacy
  work including strengthening of service and support networks for those infected and affected by HIV/
  AIDS worked well towards reducing mortality and infections spread amongst OVC and Fisher folk. The
  mix of prevention, care and impact mitigation measures should depend on the stage of development of
  the epidemic; in its early stages, prevention is critical but if the epidemic takes hold, the scope and scale
  of the response must necessarily expand
- Using People Living with HIV as community resource persons enhanced disclosure and reduced stigma in the community. As a result all discordant couples disclosed their status to their partners
- Due to the introduction of a stable market system by the 2SCALE soybean project to the community, more players arose with the same interest on soybean production. Transportation, aggregation and

## LESSONS LEARNT

shredding services has excited and created employment opportunities for youths.

- Climate change adaptation and mitigation worked in counties(Vihiga, Nandi, Kakamega) by involvement of communities to lobby and advocate for environmental actions through organized structures(Ward level committees), dialogue sessions with duty bearers and engagement in planning for allocation of devolved resources and the push for enforcement of environmental guidelines and strategies to address aspects of climate change.
- Effective use of climate information required supporting a wide range of stakeholders to access, understand and appropriately apply climate information within specific decision making processes across timescales.
- On-farm seed production could have been sustainable if the strong partnership existed among stakeholders, and that seed multipliers were given premium prices for their seed which could be supported by the legal frame work that encourages the seed production. This will required establishment of community seed banks to strengthen seed supply systems.
- Implementation of soil protection / rehabilitation measures that go beyond individual farms was likely to accelerate adoption of environment friendly technologies and natural resource management.
- Use of conservation Agriculture principles such as Cover crops, mulching and minimum tillage reduced labour demands, time spent on farming activities and enhanced women ability to create additional incomes from sale of farm produce and access to markets.
- Mucuna cover crop was highly adopted due to its multipurpose benefits such as improvement of soil fertility, volume of milk produced in cows and its medicinal values after value addition. The value added Mucuna was used in backing cakes, *mandazi* and to cure ulcers as testified by the farmers. Most farmers also preferred Mucuna since it had more biomass and added soil fertility faster than other crops. However, Mucuna being climbing crop posed the problem of suffocating other plants.
- Higher incomes for women were realized in the Africa leafy vegetables. However, men still controlled family incomes, expenditure and access to financial services therefore limiting benefits accrued to women.
- Political good will was an effective tool towards policy engagement especially for county climate change Bill enactment in Vihiga, Kakamega and Nandi.
- Having research trials together with farmers' plots provided evidence on effective technologies under Regenerative Agriculture (RA) and CA practices. For instance RA and CA practices, especially use or organic fertilizers offered best options to farmers when inorganic fertilizer prices were so high. However, use of organic fertilizers was limited to small holder farms. There was still lots of competition on mulching materials especially maize stoves which in most cases were preferred to animal feeds as compared to mulch. More so farmers prefer having living cover crops due to the multiple benefits of soil improvement, moisture conservation and product harvest.
- From preliminary observations on vegetable production, integrating organic manures and inorganic fertilizers gave the best results in terms of yield and quality. However, vegetables treated with organic manures were harvested for a longer period as compared to the integrated treatment and sole inorganic fertilizer application. Farmers also preferred having fodder trees/crops at the farm hedges due to the reduced land sizes.
- The embedded Holistic development approaches toward peacebuilding such as improvement of economic livelihoods of the community was believed to bring better peace dividends. This was essential to bolstering current agricultural production initiatives, like in Mt. Elgon areas, by exploring value chain approaches for improved livelihoods by better market access.
- Needs assessment with communities is imperative in supporting participatory identification of specific gaps areas of focus for proposal development as well as assisting communities find solutions to their own problems.

# **SUCCESS STORIES**

## SOYKIT FOR BETTER NUTRITION AND INCOMES IN WESTERN KENYA.

The ability of women to operate as food entrepreneurs presents opportunities to leverage at-home production technologies to not only support family nutrition but also generate income. 2SCALE project that works towards incubating and accelerating inclusive agribusiness in Africa has incorporated soy-kit in its intervention approach among the partners that they are working with to make this dream come true.

Soy-kit is a simple set of 17 different equipment mainly used in grinding various grains more so soybeans for value addition at the cottage level. The kit can be manually or automatically operated to grind 10-15 kgs of soybean that can be processed further into 30-40 liters of soybean milk or yoghurt per day.

25 women led groups acquired 25 soy kits equipment to enable them undertake value addition and enhance nutritional and economic resilience. Value addition increased the competitiveness of Soya leading to improved markets thus increased incomes for these women groups. The women managed to process and sell averagely 20 litres of soymilk and yoghurt from an average cost of Kes.70 for a kg of raw soybeans to an average of Kes.300 for an equivalent capacity of soy milk leading a total income of Kes 6000 Daily. This call for the need to replicate these gains to other to the other 3000 Soya beans farmers.

Demonstrations of soybean value addition using soy-kit

## FROM YOUR FARM TO YOUR TABLE: CASE STUDY OF LILIAN MWANGA Adoption of value addition technology under the 2scale soy-

Lilian Mwanga, a Soybean producer from Abachamana Women Group, Lung'anyiro, Matungu sub-county, Kakamega County has embraced Soybean Value addition technology. She produces products such as cakes, mandazis, crunches, milk, yoghurt and poultry feeds from soybean. Before the 2Scale soybean project begun, Lilian said she was a house wife and fully depended on her husband for provision. She practiced production of soybean but at a smaller portion of land for home consumption.

Through the project intervention, Lilian says that she acquired knowledge on value addition which has been very beneficial and should be embraced more. She works on individual value addition projects but is also a trainer of trainer from Abachamana Women Group. She trains various group members on value addition twice a month enabling her reach 40 women, and 10 Youth from within and outside Lung'anyiro.

The 10 youth have adopted value addition and take advantage of the weekends to sell their soya products since they have to be in school during weekdays. The youth have attained a sense of independence and are able to carter for some of their needs with the profits received. This milestone has made Lilian happy and she indicates that she has been able to lease land elsewhere and plant soya since the land at home is not enough. Through soybean production, Lilian has been able to open her store, produce value added products and sell them. Her experience shows that value addition produces increased incomes. Through selling her products locally, she was able to secure three school tenders, and in six months she was able to earn Kshs 82,000 and a profit Kshs of 38,000. This enabled her expand the area under soya production, attend to some of her basic needs which she attest has created cohesion and given her a voice in deci-

#### CLIMATE CHANGE GOVERNANCE PROJECT IMPACT STORY

For many years communities within Western region have valued the Eucalyptus tree because of its economic benefits which include selling it for timber, fuel and construction. The tree is preferred because of its fast maturity rate. Unfortunately, the side effects of this trees have been greatly overlooked and its impact is evident due to reduced agricultural productivity, consumes high volume of water which leads to drying up of water sources. ADS Western has been on the forefront of championing climate change adaptation, mitigation and resilience through sensitization and training of communities within 25 wards of Vihiga County in partnership with Christian Aid, ADA Consortium and the County Government of Vihiga.

Ward Climate Change planning committees were established and trained on importance of environmental

After the trainings, the committee members of Mwibona Ward were able to do an assessment of the effects of Eucalyptus within their ward and confirmed its negative impact on water resources. Their findings were, a spring with Eucalyptus planted on its banks has reduced its water volume over time while a spring planted with bamboo around its banks has sustained its water volume and had improved water quality.

Its because of such findings that the committee members are advocating on the importance of conserving water sources by planting more bamboo trees along the banks and allocated designated areas away from the water sources to plant the Eucalyptus. The Ward climate change committee members of Mwibona are using bamboo trees to make briquette, as a clean source of fuel that emits low carbon thus reducing greenhouse gas emission to the atmosphere.

The committee intends to create awareness on use of clean energy inorder to get market for the briquettes while producing bamboo on large scale to be used to make furniture thus creating job opportunities and earn incomes from the sale of the bamboo products.

Further more, the Ward Climate Change Committees having undergone trainings on Proposal writing, they were able to develop fundable proposals which were vetted by County Climate Change committee members resulting to funding and installation of the Ipali Solar powered water project which is benefiting 50 households and serve the hospital in West Bunyore.

### HEALTH AND SOCIAL PROTECTION Mary Masase Nyamusi, caregiver beneficiary lwandeti ward.

Mary Nyamusi Masase is a caregiver and a widow aged 46 years taking care of 5 OVC (4M, IF) who are all of school going age. Mary was enrolled in OVC programming in 2016. She was identified through the case management process as one of the caregivers who was transitioned from APHIA PLUS. She is a PLWHIV. Life was not easy as she was the sole bread winner who was supposed to ensure that Children had to receive all the basic needs including the 4 core domains of MWENDO OVC Project. Her children found it hard to go to school, get home clothes, access medical services, know their HIV status, access balanced diet and to acquire birth certificates. Mary was living in denial since she never knew that she would ever be in a position to take care of her children and eve suppress her Viral Load.

Caregiver, Mary Masase roasting Maize and selling her glossary -Webuye –Eldoret road (Kaburengu junction)

CPARA assessment conducted by a CHV indicated that the household was highly vulnerable and was at 0-7 benchmark. This called for an immediate intervention to ensure that the household was supported to acquire all the birth certificates and NHIF. Mary was trained on business skills and given a grant of 5, 000, and an umbrella as a productive asset to restart her business since she was a member of a SILC group. She was also actively involved in small business of selling groundnuts along Kaburengu junction. This aimed at ensuring that Mary could be in a position to take care of her children and sustain herself.

Upon receiving the benefits, Mary changed from selling ground nuts and ventured into maize roasting business and glossary business. This business thrived well and looking at her records, her net income increased from Kes 5,000 to 11,000 monthly. She joined a SILC group for savings and

loaning and she was selected as the chairperson. This enabled her to take loans to boost her business and thus provide for their household needs.

Through this intervention, she has been able to attend to her normal facility appointment at Webuye-Ampath on time resulting in her suppressed viral loads by 67%. This has enabled her become an ambassador to other clients facing HIV/AIDS stigma. Mary is now able to provide for all her children's needs. Another

## ANDREW MASINDE: BUSINESS GRANTS FOR VIRAL LOAD SUPPRESSION

Andrew Masinde is a caregiver aged 54 years. He hails from Masasuli area in Lwandeti Ward. Andrew is a widower who lost his wife in 2009. Andrews household is affected by HIV where 3 members of the household live with the virus. This includes the 2 adults and one child. All the 3 members take their drugs at Matete health Centre. Andrew and the household were enrolled in OVC project in 2012 and were among the members who transitioned to the MWENDO project.

Andrew served as a school gateman at a nearby primary school called Masasuli where he received a salary of Kes 2,500 per month. Andrew and the family did not afford their basic needs such as food to say the least about other needs. Andrew and the 2 other household members who were HIV infected had high viral loads of around 123,067 copies that was quite alarming. ADSW administered case conference for the OVC and it was evident that there was lack of food, treatment support, timer, balanced diet as a result of poverty. Interventions were put in place to support the OVC with timer and pill box, allocate Andrew with a treatment

Andrew made a decision to start a small business that included selling of sweets, Mandazis and sodas at the school. This enabled him to improve his monthly income to Kes 12,000 enabling him buy food and meet other households needs. He engaged in saving 500 since 2020 and by 2021 his savings accumulated to 15,790 monthly in a SILC group where he borrowed 2 times his savings and bought iron sheets, a door and a window that he used to raise his kiosk. The Kes. 5,000 he received as a grant was used to boost the kiosk stock that included other products for sale such as sugar, tea leaves, cooking fat, Royco, Bread and Soda. Through this Andrew was able to even support his child with transport to health facility.

Viral load for the OVC was taken after a period of 6 months and the results were at Lower Detectable Level (LDL)

Andrew Masinde- Business grants caregiver preparing his kiosk products

### ADMISSION OF PHYSICALLY DISABLED OVC TO KIMBILIO HOSPICE CENTRE

Margaret Makokha Taifa, an active 8 year old OVC under Ekonjero satellite, was enrolled on HIVAIDS care and treatment at Shisaba health center in Butere. She is physically disabled with no fully developed speech. Margaret is a last born child among the 3 children to Mr Charles Taifa who is a widower.

She stayed with her father alone in their household in Lunza hence most of the time she was lonely and went without food. The father who was busy fending for her was always absent from the homestead living her without alternative support. Being a girl child, she lacked someone to clean her appropriately. Furthermore, she seemed to be losing viral load suppression battle since she held 1248 copies which was way risky to her health.

ADS Western OVC programming made a major milestone in securing an alternative home for an extremely needy OVC. Margaret was enrolled in the project in 2020. With routine household visit, ADS-Western Social Worker and CHV established the need of the OVC and developed a strategy to seek a temporary alternative home by march 2021. By adhering to full legal procedure for changing a home for an OVC, ADS- proceeded to solicit for admission and upkeep funds at the Kimbilio hospice Centre. ADS-Kakamega staff managed to raise a total of Kes. 15,800 which was sufficient to enroll the OVC and cater for her varied needs. At the Kimbilio Hospice Centre, the OVC underwent thorough specialized care for a period of about 6 months. This included physiotherapy, HIV care and treatment therapy and other specialized care from the Centre.

The caregiver to the OVC Mr. Charles Taifa was overwhelmed with joy after reaching his daughter's designated home. Equally, there was fulfillment by ADS-Mwendo staff on this milestone. The OVC was provided with an emergency fund that was key in providing for the basic necessities of Margaret. Margaret situation improved. During our monitoring visit in August 2021, Margaret Viral load had gone to LDL with only 48 copies.

Margaret as at admission to Kimbilio hospice with the father

Margaret after 3 month of admission at Kimbilio hospice

## CHALLENGES EXPERIENCED

- The prevalence of Covid-19 affected the full participation of producer group members in various forums. ADSW utilized frontline SMS, WhatsApp and other media outlets to reach out to members.
- End of donor funding resulted to the loss of projects and competent staff which further affected continuity of interventions especially in health-related projects. ADSW undertook trainings on resource mobilization for staff and the board as well as instituting a resource mobilization committee.
- There was very high cost of farm inputs due to rise in the cost of living partly linked to Covid19. Farmers were organized into groups to purchase inputs at affordable prices as well as use ecofriendly technologies towards production of seed and improved soil fertility.
- Political uncertainty led to low farmer turn out during project activities. ADSW planned meetings in the morning and also conveyed peace message during project activities.
- High costs of soy kits for value addition led to reduced procured soy kits from 50 to 25. More linkages were done with private sector players for support towards securing the Kits though with little success.
- There were challenges related to market access, price dynamics and untimely off-taking of soya by offtakers thus delaying pay for farmers. ADS-W off-took through its investment arm (AWRICO) and paid up farmers.

## LEARNINGS

- Using People Living with HIV as community resource persons enhanced disclosure and reduced stigma in the community. As a result, all discordant couples disclosed their status to their partners.
- Due to the introduction of a stable market system by the 2SCALE soybean project to the community, more players arose with the same interest on soybean production. Transportation, aggregation and shredding services excited and created employment opportunities for youths.
- Climate change adaptation and mitigation interventions were successful by involving communities to lobby and advocate for environmental actions through organized structures (Ward level committees). The continuous dialogue sessions with duty bearers bore lots of fruit.
- Use of conservation Agriculture principles such as Cover crops, mulching and minimum tillage reduced labor demands, time spent on farming activities and enhanced women ability to create additional incomes from sale of farm produce and access to markets.
- Mucuna cover crop was highly adopted due to its multipurpose benefits such as improvement of soil
  fertility, volume of milk produced in cows and its medicinal values after value addition. The value added
  Mucuna was used in backing cakes, *mandazi* and to cure ulcers as testified by the farmers. Most farmers
  also preferred Mucuna since it had more biomass and added soil fertility faster than other crops. However,
  Mucuna being a climbing crop posed the problem of suffocating other plants.
- Political good will was an enabler towards policy engagement especially for county climate change Bill enactment in Vihiga, Kakamega and Nandi.
- From preliminary observations on vegetable production, integrating organic manures and inorganic fertilizers gave the best results in terms of yield and quality under the REALMS project. However, vegetables treated with organic manures were harvested for a longer period as compared to the integrated treatment and sole inorganic fertilizer application. Farmers also preferred having fodder trees/crops at the farm hedges due to the reduced land sizes.
- Needs assessment with communities is imperative in supporting participatory identification of specific gaps for proposal development as well as assisting communities find solutions to their own problems. This is at the heart of ADS-W development approaches.

## STAFF LIST

| No | Name                     | Position   |
|----|--------------------------|--|
